

4	Filtrators	19
4.1	Core part	20
4.2	Filtrators with separable core	21
4.3	Intersecting and joining with an element of the core	22
5	Filters	22
5.1	Filters on posets	22
5.2	Filters on meet-semilattice	23
5.3	Characterization of finitely meet-closed filtrators	24
6	Filter objects	24
6.1	Definition of filter objects	25
6.2	Order of filter objects	25
7	Lattice of filter objects	26
7.1	Minimal and maximal f.o.	26
7.2	Primary filtrator is filtered	26
7.3	Formulas for meets and joins of filter objects	26
7.4	Distributivity of the lattice of filter objects	28
7.5	Separability of core for primary filtrators	29
7.6	Filters over boolean lattices	30
7.7	Distributivity for an element of boolean core	30
8	Generalized filter base	31
9	Stars	32
9.1	Free stars	32
9.2	Stars of elements of filtrators	33
9.3	Stars of filters on boolean lattices	34
9.4	More about the lattice of filters	36
10	Atomic filter objects	37
10.1	Prime filtrator elements	38
11	Some criteria	39
12	Quasidifference and quasicomplement	43
13	Complements and core parts	46
13.1	Core part and atomic elements	48
14	Distributivity of core part over lattice operations	48
15	Fréchet filter	50
16	Complementive filter objects and factoring by a filter	51
17	Number of filters on a set	53
