Abstract	3
1 Introduction	?
1.1 Draft status	?
1.2 Intended audience	?
1.3 Reading Order	?
1.4 Our topic and rationale	?
1.5 Earlier works	?
1.6 Kinds of continuity	?
1.7 Structure of this book	?
1.8 Basic notation	?
1.8.1 Grothendieck universes	?
1.8.2 Misc	?
1.9 Unusual notation	?
2 Common knowledge, part 1	?
2.1 Order theory	?
2.1.1 Posets	?
2.1.1.1 Intersecting and joining elements	?
2.1.2 Linear order	?
2.1.3 Meets and joins	?
2.1.4 Semilattices	?
2.1.5 Lattices and complete lattices	?
2.1.6 Distributivity of lattices	?
2.1.7 Difference and complement	?
2.1.8 Boolean lattices	?
2.1.9 Center of a lattice	?
2.1.10 Atoms of posets	?
2.1.11 Kuratowski's lemma	?
2.1.12 Homomorphisms of posets and lattices	?
2.1.13 Galois connections	?
2.1.14 Co-Brouwerian lattices	?
2.1.15 Dual pseudocomplement on co-Heyting lattices	?
2.2 Intro to category theory	?
2.3 Intro to group theory	?
3 More on order theory	?
3.1 Straight maps and separation subsets	?
3.1.1 Straight maps	?
3.1.2 Separation subsets and full stars	?
3.1.3 Atomically Separable Lattices	?
3.2 Free Stars	?
3.2.1 Starrish posets	?
3.3 Quasidifference and Quasicomplement	?
3.4 Several equal ways to express pseudodifference	?
3.5 Partially ordered categories	?
3.5.1 Definition	?
