

3.5.2	Dagger categories	?
3.5.2.1	Some special classes of morphisms	?
3.6	Partitioning	?
3.7	A proposition about binary relations	?
3.8	Infinite associativity and ordinated product	?
3.8.1	Introduction	?
3.8.2	Used notation	?
3.8.2.1	Currying and uncurrying	?
	The customary definition	?
	Currying and uncurrying with a dependent variable	?
3.8.2.2	Functions with ordinal numbers of arguments	?
3.8.3	On sums of ordinals	?
3.8.4	Ordnated product	?
3.8.4.1	Introduction	?
3.8.4.2	Concatenation	?
3.8.4.3	Finite example	?
3.8.4.4	The definition	?
3.8.4.5	Definition with composition for every multiplier	?
3.8.4.6	Definition with shifting arguments	?
3.8.4.7	Associativity of ordinated product	?
	Infinite associativity implies associativity	?
	Concatenation is associative	?
<b>4</b>	<b>Filters and filtrators</b>	?
4.1	Introduction to filters and filtrators	?
4.1.1	Filters on a set	?
4.1.2	Intro to filters on a meet-semilattice	?
4.1.3	Intro to filters on a poset	?
4.1.4	Intro to filtrators	?
4.2	Filtrators	?
4.2.1	Core Part	?
4.2.2	Filtrators with Separable Core	?
4.2.3	Intersection and Joining with an Element of the Core	?
4.2.4	Characterization of Finitely Meet-Closed Filtrators	?
4.2.5	Stars of Elements of Filtrators	?
4.2.6	Atomic Elements of a Filtrator	?
4.2.7	Prime Filtrator Elements	?
4.2.8	Some Criteria	?
4.2.9	Complements and Core Parts	?
4.2.10	Core Part and Atomic Elements	?
4.2.11	Distributivity of Core Part over Lattice Operations	?
4.2.12	Co-Separability of Core	?
4.2.13	Filtrators over Boolean Lattices	?
4.2.13.1	Distributivity for an Element of Boolean Core	?
4.3	Filters on a poset	?
4.3.1	Filters on posets	?
4.3.2	Filters on meet-semilattices	?
4.3.3	Order of filters. Principal filters	?
4.3.3.1	Minimal and maximal filters	?
4.3.4	Primary filtrator is filtered	?
4.3.5	Alignment	?
4.3.6	Co-separability of Core for Primary Filtrators	?
4.3.7	Core Part	?
4.3.8	Intersecting and Joining with an Element of the Core	?
4.3.9	Formulas for Meets and Joins of Filters	?
4.3.10	Separability of Core for Primary Filtrators	?
