

Contents

Part 1. Introductory chapters	8
Chapter 1. Introduction	9
1.1. License and editing	9
1.2. Intended audience	9
1.3. Reading Order	9
1.4. Our topic and rationale	10
1.5. Earlier works	10
1.6. Kinds of continuity	11
1.7. Responses to some accusations against style of my exposition	11
1.8. Structure of this book	12
1.9. Basic notation	12
1.10. Implicit arguments	13
1.11. Unusual notation	13
Chapter 2. Common knowledge, part 1	15
2.1. Order theory	15
2.2. Intro to category theory	31
2.3. Intro to group theory	34
Chapter 3. More on order theory	36
3.1. Straight maps and separation subsets	36
3.2. Quasidifference and Quasicomplement	39
3.3. Several equal ways to express pseudodifference	42
3.4. Partially ordered categories	43
3.5. Partitioning	46
3.6. A proposition about binary relations	47
3.7. Infinite associativity and ordinated product	47
3.8. Galois surjections	55
3.9. Some properties of frames	55
Chapter 4. Typed sets and category Rel	61
4.1. Relational structures	61
4.2. Typed elements and typed sets	61
4.3. Category Rel	62
4.4. Product of typed sets	66
Chapter 5. Filters and filtrators	68
5.1. Implication tuples	68
5.2. Introduction to filters and filtrators	68
5.3. Filters on a poset	69
5.4. Filters on a Set	71
5.5. Filtrators	72
5.6. Alternative primary filtrators	74
5.7. Basic properties of filters	80
