

19.17. Binary relations are pointfree functors	310
Chapter 20. Alternative representations of binary relations	312
Part 4. Staroids and multifunctors	317
Chapter 21. Multifunctors and staroids	318
21.1. Product of two functors	318
21.2. Definition of staroids	319
21.3. Upgrading and downgrading a set regarding a filtrator	322
21.4. Principal staroids	323
21.5. Multifunctors	325
21.6. Join of multifunctors	327
21.7. Infinite product of poset elements	329
21.8. On products of staroids	332
21.9. Star categories	335
21.10. Product of an arbitrary number of functors	338
21.11. Multireloids	347
21.12. Subatomic product of functors	351
21.13. On products and projections	354
21.14. Relationships between cross-composition and subatomic products	357
21.15. Cross-inner and cross-outer product	360
21.16. Coordinate-wise continuity	361
21.17. Upgrading and downgrading multifunctors	362
21.18. On pseudofunctors	364
21.19. Identity staroids and multifunctors	369
21.20. Counter-examples	376
21.21. Conjectures	379
Part 5. Postface	383
Chapter 22. Postface	384
22.1. Pointfree reloids	384
22.2. Formalizing this theory	384
Appendix A. Using logic of generalizations	386
A.1. Logic of generalization	386
Appendix. Index	388
Appendix. Bibliography	392
